Overall result (8.07 CGPA)

Subjects: Software Engineering, Data Structures, Design and Analysis of Algorithms, Database Management Systems, Operating System Concepts, Data Mining and Data Warehousing, Machine Learning, Web technology and applications, Big Data Analytics, Computer Organization

## WORK EXPERIENCE

**Oct 2019 – Apr 2021, Software Engineer, Manhattan Associates, India**

- Designed and implemented new user-facing features with the latest UI technologies like HTML, CSS and JavaScript (Angular)
- Co-ordinated with back end developers, designers and client service personnel to meet project goals and handled team dynamics creditably
- Created Jasmine test cases to cover the code functionality and efficiency for the desired workflows
- Evaluated the developed features on platforms like Android, IOS and the web for user acceptance
- Debugged code to solve functionality issues in the front end of website and mobile applications

**Aug 2019 – Sep 2019, Software Engineer Intern, Manhattan Associates, India**

- Facilitated senior colleagues in identifying and resolving minor defects with respect to the user interface
- Authored and maintained documentation on user journey flows of the application
- Validated functionalities against requirements before product deployment
- Co-ordinated the SCRUM master during sprint planning meetings and divided tasks between a 7-person project sub team

**Jan 2019 – Apr 2019 Intern, Simeio Solutions, India**

- Established the right access to users based on the roles within an organization and other supporting activities
- Supported a global client called Campbell Soup by administering identity access to the employees

- Collaborated with other team members in generating weekly reports on users' accesses and log analysis

## SKILLS PROFILE

### Technical Skills

- Industry experience including 2-3 years of experience as a Software Engineer in a Linux based environment
- Proficient in front-end technologies like HTML, CSS and JavaScript/TypeScript
- Very good understanding of the Angular web application framework
- Demonstrated experience in testing in a client server and web based applications (Android, IOS and web)
- Strong and recent Agile experience
- Excellent knowledge of the MySQL DBMS and the SQL language
- Python programming experience through developing mini projects
- Good understanding of Git or related source control technology (Bitbucket)
- Functional knowledge of the Point of sale and the Store inventory and fulfillment products domain
- Experience working with Test Driven Development, Continuous Integration and Continuous Delivery pipelines

### Professional Skills

- **Communication:** Excellent oral and written communication skills enhanced through collaboration with multiple teams and clients around the globe
- **Teamwork:** Developed the strength and ability to work as a part of cross functional team through previous work experience with more than 40 people across India, USA and France
- **Leadership:** Led and mentored 2 interns in developing and testing new software features of the main product
- **Analytical:** Strong analytical skills developed through implementing projects related to data preparation, analysis and management

## ACHIEVEMENTS

- Received the India: Sir Peter Freyer Special 2021 Scholarship for excellence in academics
- Presented a project paper titled "Emotion based Music Player using Convolutional Neural Networks" at a technology conference held at CMRIT, India

## INTERESTS/HOBBIES

**Photography:** Took part in photography contests organised at college and at the workplace and was part of the college photography club called IRIS.

**Travelling:** Love to travel, explore new destinations and meet new people. Travelled to places in and around hometown (India). Awaiting to travel to fascinating places in Ireland and the rest of Europe.

**Jogging:** Enjoy jogging early mornings and train three times per week for approximately an hour each.

**Volunteering:** Volunteered at events including the Galway International Arts Festival, College Annual Fests and as a Placement Coordinator taking care of recruitments.
